Software Engineer

Education

Infomyanmar University
Current attending HNC in
computing

Dagon University
First year Myanmar Major

Certificate

Foundation level in IT
Intermediate English

Language

Fluent in burmese
B1 English

● Career Objective

As a passionate and creative student with a strong interest in web design, I am eager to begin my professional journey by contributing to real-world projects. With a basic understanding of HTML, CSS. I aim to develop user-friendly and visually appealing websites. I am committed to learning, growing, and becoming a valuable part of a creative web development team.

● Experience

HTML, CSS

Designed and developed a simple web-based library management system to manage books, and categories. Focused on user-friendly layout and clear structure for easy navigation and management.

Java (GUI)

Built a desktop application to display and manage movie information such as title, genre, rating, and release year. Applied object-oriented programming principles and user interface design using Java Swing.
